

Dentists with a difference

An exciting fusion

By Deborah Rent
Special Features Writer

Walking into the new office of daniel daniel Dentistry is more like arriving at a day spa than a dental office. It is visually stunning with simple lines, gently curved walls and elegant furnishings. It is meant to inspire relaxation and confidence — and it does. This office is a synergist relationship between a dentist and a medical doctor with a common vision — helping people feel good about themselves and helping them be all they can be. It is an exciting fusion of cosmetic dentistry and medical aesthetics.

Dr. Daniel Daniel opened his office at 5855 Spring Garden Road, suite B210, in February after having spent a number of years practicing in Calgary, Alberta. His philosophy is simple, yet effective.

“It is about building relationships. You have to listen to people’s needs and wants and set goals based on those conversations,” explains Dr. Daniel. “When a client comes to us for a consultation, we do a full assessment. Communication is an integral part of the process. It’s about finding out what our clients want, and doing our best to help them achieve the goals that they have set out for themselves. We are here to assist in the decision making process by providing options for treatment and answering questions about those options. In essence, we create a long term strategy for dental health.”

Dr. Daniel has a wide number of services available to help people meet their goals. The office offers invisalign, the nearly invisible way to straighten teeth,

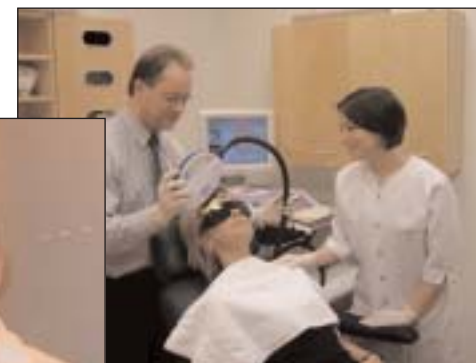

the CEREC system, which allows for one appointment porcelain restorations, as well as the Zoom! in-office whitening system, which whitens your teeth in a single appointment. There are digital radiographs, an in-office photo studio, as well as spacious treatment rooms that have been designed with clients comfort in mind. Natural lighting, comfortable chairs and something that will take your mind off of any procedure you may be having done — the TLC entertainment system, the only one in Atlantic Canada. You can have your teeth restored with porcelain restorations while viewing your beloved soap opera, listening to your favourite music, or watching the latest movie on DVD.

Dr. Daniel is a general dentist with a focus on cosmetic, comprehensive dentistry. Creating beautiful smiles is something he is very proud of.

“I want to change people’s lives, by giving them the healthy, beautiful smile they’ve always dreamed of,” says Dr. Daniel. “Feeling confident about the way your teeth look is important in today’s social climate, and there is no reason anyone shouldn’t be proud of their smile.”

Dr. Renier van Aardt is a family physician that devotes much of his time to the practice of minimally invasive cosmetic medicine. With a broad base of clinical experience and expertise to draw on, his approach to patient care is similar to Dr. Daniel’s.

“What we do is help people achieve a higher level of self confidence and feel good about themselves. A big aspect of what I do is assist patients in achieving a more youthful appearance. Whether that’s hair free, even textured and youthful skin, or treating sun damage, acne, scarring and genetic factors that cause freck-

ling and other unwanted pigments, spider veins and broken capillaries, large pores, fine lines, wrinkles, and a loss of elasticity,” says van Aardt. “Our goal is to offer state of the art, effective comprehensive medical aesthetic treatments. What Daniel and I are doing is very emotional for people. I’ve had clients in tears because they can have their picture taken with their family for the first time, or they can go on dates and feel confident. It is very rewarding to see what can often be life changing results! Our aim is for our clients to achieve beautiful skin and assist them to maintain it for life.”

Dr. Renier van Aardt is the medical director of Laser Plus in Halifax, Yarmouth and Truro and is personally involved in all treatments with the support of a well-trained team. Clinical spa services such as facials and chemical peels are also offered in conjunction with the cosmeceutical DerMed line and Jane Iredale mineral makeup.

(Clockwise) Dr. Daniel Daniel and Dr. Renier van Aardt proved they can create a unique and stylish dentistry office. Dr. Aardt with a patient. Even their bathrooms have style.

With the services of Dr. Daniel Daniel, Dr. Renier van Aardt, and their respective teams, all your cosmetic dental and medical needs can now be had under one roof.
